Disney Animal Quiz – Two Truths and a Lie

Answer Key

Raccoons:

There are 10 different species of raccoon.

There are 6 different species.

Elephants:

They use their tusks to hunt prey.

Elephants are herbivores. They use their tusks to strip bark from trees and dig into the ground to find plants and water.

Mandrills:

The narrow set of their eyes makes them have poor eyesight.

The narrow set of their eyes gives them binocular vision.

Lions:

They are the fastest land mammals, traveling up to 60 miles per hour.

Cheetahs are the fastest land mammals. They can run up to 58 miles per hour.

Lions can run up to 50 miles per hour.

Tigers:

Like most cats, tigers do not like water.

UNLIKE most cats, tigers love water!

Alligators:

They have only existed for the past few hundred years.

They have been around for 65 million years, earning them the nickname "living fossils."

Hamsters:

Hamsters like to live in groups.

Hamsters are actually solitary animals. They like living alone.

Chameleons:

Chameleons change color to camouflage themselves from predators.

They do NOT change color for camouflage. They use this ability to cool off, warm up, or even show their current mood.

Foxes:

Males are called bulls and females are called cows.

Males are called tods and females are called vixens (hence Tod and Vixey in “The Fox and the Hound”!).

Dalmatian Dogs:

Dalmatians are born with their spots.

Dalmatians are born completely spot-less. Their spots appear as they grow older.

Bonus:

Both Angus from “Brave” and Philippe from “Beauty and the Beast” are what type of horse?

They are both Clydesdale horses.
